

TUMBLING TRACK GREGOR – SET UP INSTRUCTION

STEEL FRAME

Place the stands and prepare enough space for all tumbling track starting from the “front/end stand”.

Please note:
Once unfolded track will be unable to be moved.

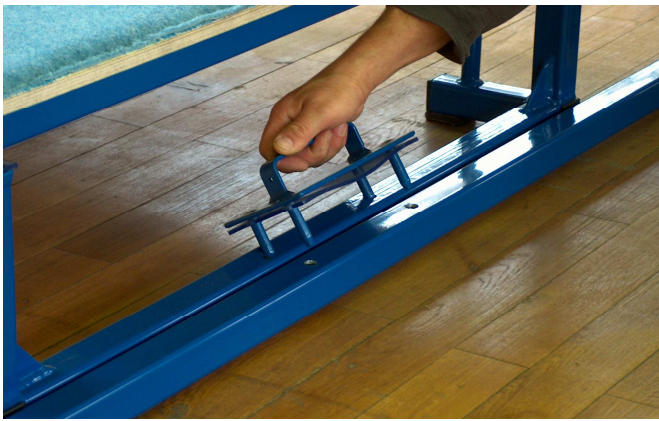

Before placing the platforms place silicone pads on the stands.

RUN-UP AREA

Once the stands and platforms are unfolded join them with the run-up Area. You can also start from Run-up area and then unfold the tumbling track.

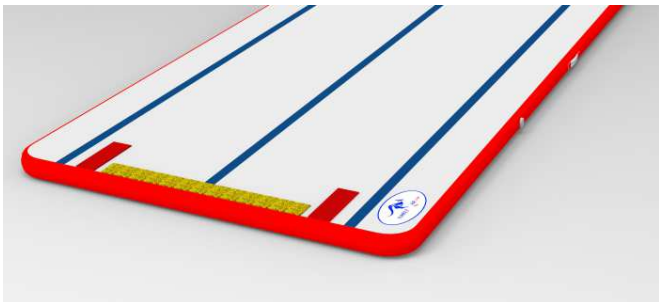

Join Run-up Area and Tumbling track with connection part presented on the picture.

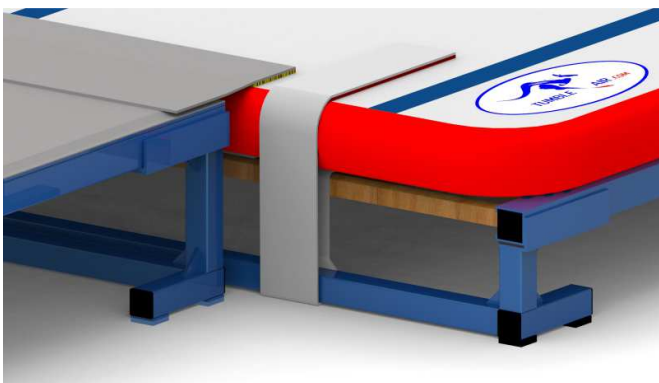

AIR COVER

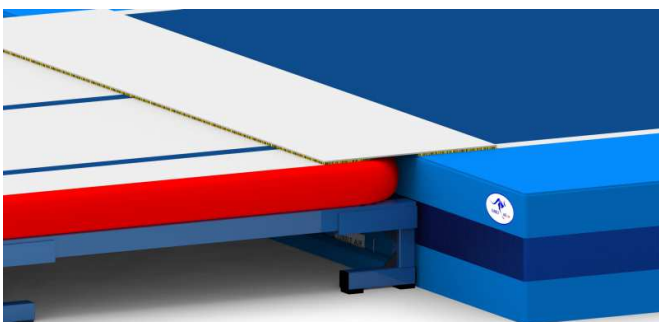

After setting up the steel frame unfold the Air Cover.

Make sure that each end of the Air Cover is attached to the appropriate side of the track. Picture on the left present velcros which should be attached with Run-up Area.

Velcro strap connection with Run-up Area.

Velcro strap connection with Landing Area.
