

Ref. 200-000-0

complete high-performance professional tumbling track

ultra-dynamic inflatable cover - NEVER BREAKS

very silent work and stable construction

10-year warranty

with run-up area and landing area

Tumbling Track GREGOR is a modern set for high-performance exercises, based on the solutions tested for many years by sportspeople, coaches and technologists. Meeting the strict requirements set by the champions of discipline. Compliant with the general rules of professional gymnastics.

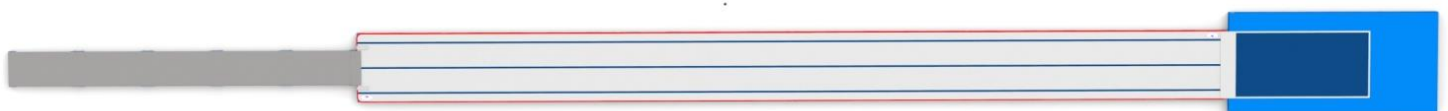

Main elements of the set:

- rollable pneumatic, dynamic and elastic covering of the track, which **never breaks** and largely reduces the risk of injuries;
- steel elements of the track frame with flexible and durable fiberglass rods, which **never fall out**;
- Run-up Area designed to be connected fast and durably with the track supporting structure;
- Landing Area of the dimensions of 600x300x30 cm (inflatable **AIR JUMP®** technology)
- a Scoprega compressor and a Carrying Bag.

10 x 1m

25 x 2m

6 x 3m

The track is designed as the **One Track One Pack system**, so it may be placed on one Trolley Platform.

The entire set is optimized in order to facilitate, to the maximum degree, the installation, disassembly, transportation and storage of the set.

There are also available additional accessories, such as transport trolleys for easy transportation, installation, disassembly and storage of the track.

One Track One Pack system

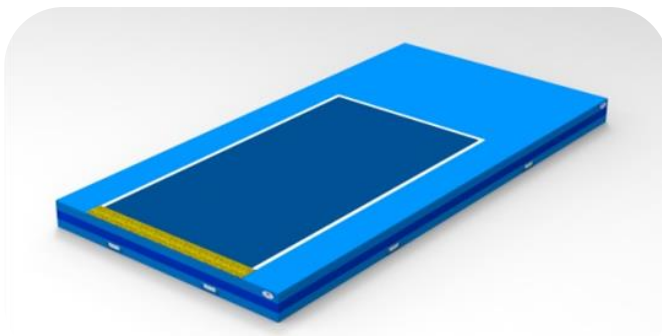

AIR COVER – NEVER BREAKS

The main advantages of our construction:

- low weight of the respective elements of the set;
- simple quick-assembly system providing **stable and durable connections** of structural elements;
- **ultra silent and stable work** thanks to innovative construction and 56 rubber pads included in the set.

Optionally, there is available the system for stabilizing the pressure at the required level.

LANDING AREA

RUN-UP AREA

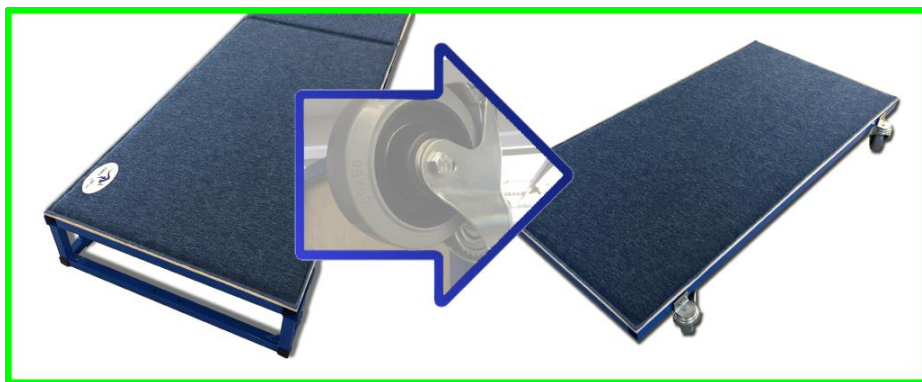

Recent improvements:

1. Practical Trolleys from Run-up Area

It is possible now to easily transform the Run-up Area from **Tumbling Track GREGOR** to very practical trolleys by using easily removable wheels. If you need to move your sport equipment but do not want to buy additional trolleys it is a perfect way to do it.

Run- up Area

Mounting the wheels

Easy and fast installation of wheels,
without screws or extra tools

2. Durable coatings on fiberglass rods

Advantages:

- Longer life-span of the cover
- Less noise during tumbling
- Better rebound
