

TRAMP PROTECTOR

INFLATABLE SAFETY MATS AROUND THE TRAMPOLINE

Tramp Protector is an innovative set of pneumatic mats produced in the **AIR JUMP®** technology. That innovative structure of inflatable sports mats eliminates all the previous inconveniences and difficulties during the transportation, use and storage of traditional equipment.

EASY FOLDING

SMALL STORAGE SPACE

ACCORDING TO EUROPEAN NORM FOR MATS - EN 12503

ADVANTAGES:

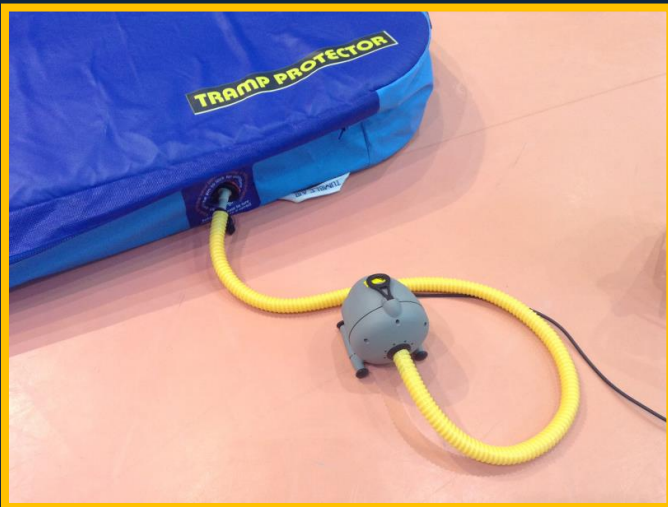

SAFE FALLING

STABLE LANDING

NO CONTINUOUS PUMPING

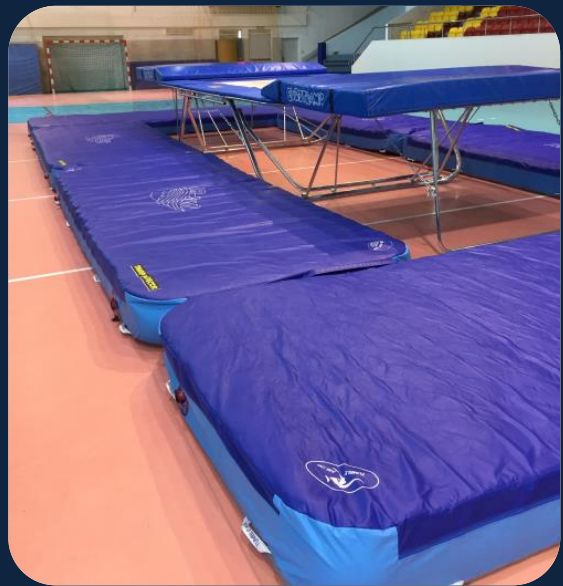

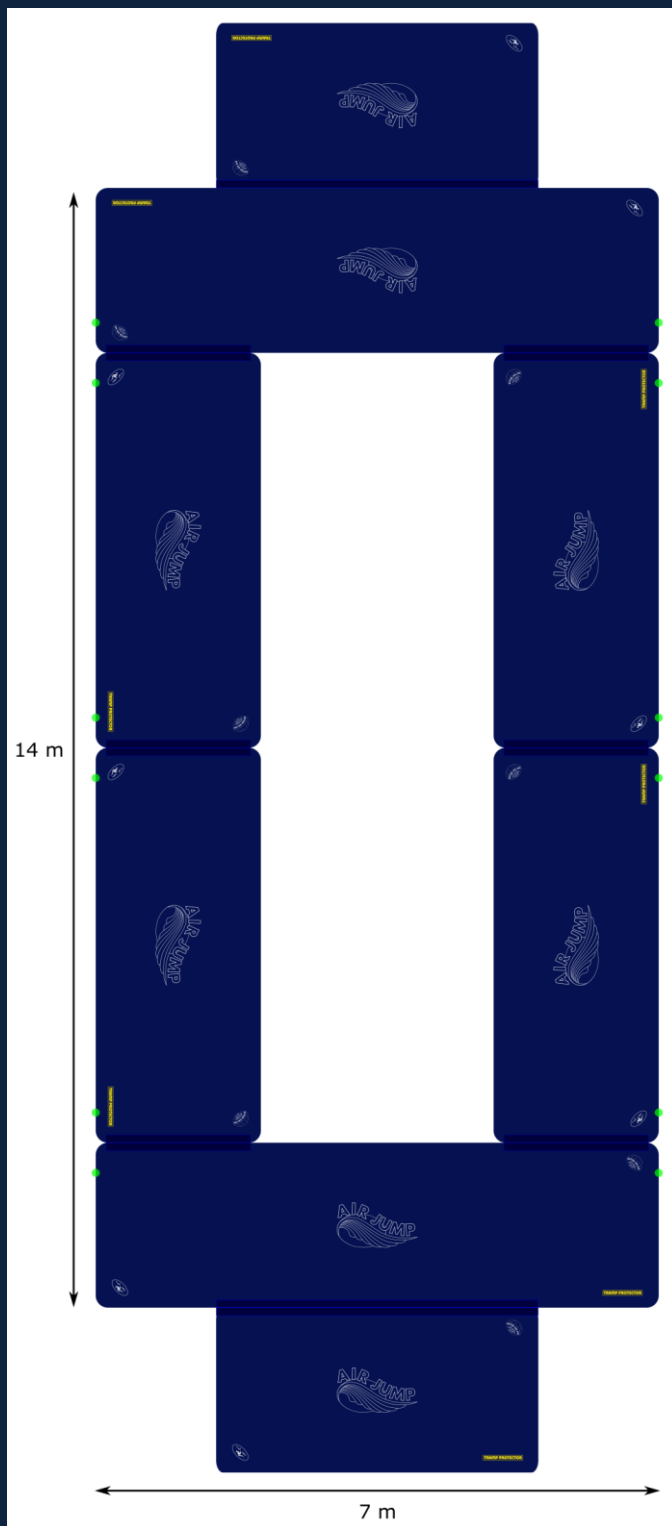

STABLE SURFACE

The protective zone built of pneumatic mats does not require continuous inflation, and its respective elements are pumped separately and connected with Velcro straps. The main advantage of **Tramp Protector** mats is the possibility to fold and unfold them quickly, and so during transportation and storage they take up much less space than traditional foam mats.

The Tramp Protector mats are compliant with the general rules of professional gymnastics
